

ESSENTIAL INFORMATION WINGS OVER EAST AFRICA

PASSPORT AND VISA INFORMATION

Your passport needs to be valid for **at least six (6) months** after your journey ends, and should have a minimum of six (6) blank visa pages for entry and exit stamps.

Uganda

An Electronic Visa (eVisa) visa is required for U.S. and Canadian passport holders for entry into Uganda. To apply for an eVisa, visit <https://visas.immigration.go.ug>. The current fee for a single-entry visa is USD \$51.50 (subject to change without notice.) Read and follow all instructions carefully to ensure a smooth arrival in Uganda. Please be aware that eVisas are valid for 90 days after issuance. Therefore, do not apply for your eVisa too far in advance.

During the application process you will be required to upload a copy of your International Certificate of Vaccination for yellow fever provided by your physician (refer to the **Vaccinations** section below for further specifics.)

Tanzania

A tourist visa is required for U.S. and Canadian passport holders for entry into Tanzania. There are currently two options available as outlined below. A&K recommends an electronic visa (eVisa).

Electronic Visa (eVisa): To apply for an eVisa, visit <eservices.immigration.go.tz/visa>. The current fee for a multiple-entry visa, which is valid for one year, is USD \$100 (subject to change without notice). We recommend that you apply at least 60 days prior to your arrival date.

When applying for your eVisa make sure you have your passport details, a copy of your passport photo and return ticket, as you will need to upload these documents to complete the application process. Read and follow all instructions carefully to ensure a smooth arrival in Tanzania.

- Complete the “Travel Information” section of the on-line application as indicated below:
 - A. Type of Visa: Multiple Entry
 - B. Purpose of Visit: “Leisure and Holiday”
 - C. Port Type: Choose either “Airports” or “Roads”
 - D. Port of Entry and Port of Departure: These specific ports may be left blank
 - E. Date of Arrival: Enter your date of entry for Tanzania
 - F. Departure Date: Enter your departure date from Tanzania
 - G. Host Details: Select “Company/Organization”
 - H. Full names and Physical Address of the Host: Abercrombie & Kent Tanzania, Njiro Hil, P.O. Box 427. Arusha
 - I. Host Telephone Number: +255 272 508 348
 - J. Host Email: info@abercrombiekent.co.tz
 - K. Where are you going to stay? Choose hotel from the dropdown menu and then enter the contact information of the first hotel on your itinerary.

If you experience technical problems with the eVisa website, try again a few hours later or the following day.

A visa can also be obtained on arrival in Tanzania, however, the visa on arrival process requires applicants to stand in several different lines with wait times of two hours or longer.

Kenya

An Electronic Tourist Visa (eVisa) is required for U.S. and Canadian passport holders for entry into Kenya. To apply for an eVisa, visit <evisa.go.ke/evisa.html>. The current fee for a single-

entry* visa is USD \$51 (subject to change without notice). A tourist visa is only valid for 90 days from the date of issuance, so do not apply for your Kenya visa more than 90 days prior to departure.

Kenya is currently waiving visa requirements for children ages 15 or younger. Children in this age group need only present a valid passport upon arrival.

When applying for your eVisa make sure you have your passport details, a copy of your passport photo and your itinerary for your journey in Kenya, as you will need to upload these documents to complete the application process.

Please note the following:

- You will need to indicate the type of visa you require. A single-entry eVisa for Kenya allows you to enter, exit and re-enter the country after visiting either Tanzania, Uganda or Rwanda, without having to purchase a multiple-entry visa.

- Complete the "Travel Information" section of the application as indicated below:
 - A. Applicants Reason for Travel: Select Tourism
 - B. Entry Date: Enter your date of entry for Kenya
 - C. Departure Date: Enter your departure date from Kenya
 - D. Host Details: Select Firm
 - E. Full names and Physical Address of the Host: Abercrombie & Kent Nairobi, Mombasa Road
 - F. Host Telephone Number: +254206950000
 - G. Host Email: info@abercrombiekent.co.ke
 - H. Choose how you will be arriving int Kenya: Air, Ship, Road
 - I. Select" Point of Entry" from drop down menu

If you experience technical problems with the eVisa website, try again a few hours later or the following day.

Our partner VisaCentral offers easy, efficient U.S. passport and visa processing. Visit them online at visacentral.com/abercrombiekent or call 844 823 1224 and reference A&K's account number 73001. Service fees apply.

Citizens of other countries should contact the appropriate consular office for entry requirements pertaining to their journey.

COVID-19 COUNTRY ENTRY REQUIREMENTS & TRAVEL ADVISORIES

A&K requires proof of COVID-19 vaccination for travel on this journey.

The following are the current COVID-19 screening requirements for entry into **Uganda, Tanzania** and **Kenya** for U.S. and Canadian residents. Visit the U.S. Department of State at travel.state.gov or the Government of Canada at travel.gc.ca/travelling/advisories for up-to-date information and travel advisories. All requirements are subject to change.

Uganda

- Present an original COVID-19 vaccination certificate indicating full vaccination completed no less than 14 days before arrival. The current approved vaccines are Pfizer (Comirnaty), Moderna (Spikevax), AstraZeneca (Vaxzevria) and Janssen/Johnson & Johnson (Ad26.COV2.S). To meet changing requirements, a booster shot is recommended. Children aged 5 years and under are exempt.

- All travellers arriving to and departing from Uganda are required to complete an online Health Declaration form <https://poe-screening.health.go.ug> within 24 hours of their flight time. There are two online forms: Arrival and Departure. Travellers completing the

Departure form will need to indicate which districts they have visited during their stay in Uganda. Please ensure you complete this information accurately to avoid a possible fine. The most frequently visited districts in Uganda are listed below:

Entebbe - Wakiso District
Bwindi National Park - Kanungu District
Queen Elizabeth National Park - Kasese District
Kibale National Park - Fortportal District
Murchison Falls National Park - Masindi District
Kampala - Kampala District

Upon completing either form, you will receive a QR code which you will be required to present to Port Health staff on arrival and again, on departure in Uganda. Save the QR code in your phone and you may want to print out a copy to carry with you.

Primate Tracking Restrictions Related to Covid-19

The following are the current COVID-19 restrictions related to primate tracking excursions in Uganda. These requirements are subject to change given the fluidity of the situation.

- A maximum of eight (8) trackers shall be allowed to track a gorilla group per day.
- A maximum of six (6) trackers shall be allowed to track a chimpanzee group at a time.
- Trackers must keep a distance of not less than 10 meters (32 feet) away from the gorillas and chimpanzees during this period.
- All trackers and porters must wear masks. Visitors will take frequent breaks during the trek to breathe fresh air.

Tanzania

- Present an original COVID-19 vaccination certificate indicating full vaccination completed at least 14 days prior to arrival. The current approved vaccines are Pfizer (Comirnaty), Moderna (Spikevax) and AstraZeneca (Vaxzevria) and Janssen/Johnson & Johnson (Ad26.COV2.S). To meet changing requirements, a booster shot is recommended.
- Any asymptomatic travellers with a positive test result will be subject to mandatory quarantine, at a designated location under surveillance until they test negative using PCR tests, or otherwise evaluated by public health experts as non-infectious. Any symptomatic travellers with positive results will be isolated for treatment at designated health facilities until they become asymptomatic and test negative using PCR tests. The list of quarantine locations can be found at www.moh.go.tz. Any related expenses will be the responsibility of the traveller.
- Travellers are subject to medical screening on arrival, including a temperature check, questionnaire, and visual assessment.

Kenya

- Present an original COVID-19 vaccination certificate indicating full vaccination completed at least 14 days prior to arrival. The current approved vaccines are Pfizer (Comirnaty), Moderna (Spikevax) and AstraZeneca (Vaxzevria) and Janssen/Johnson & Johnson (Ad26.COV2.S). To meet changing requirements, a booster shot is recommended. Children ages 12 and under are exempt from this vaccination requirement.
- Travellers are subject to medical screening on arrival in Kenya, including a temperature check, questionnaire and visual assessment.

COVID-19 Testing Information

A&K will arrange any required COVID-19 testing during your time in Uganda, Tanzania and Kenya as follows:

In **Uganda**, the current cost of local testing is USD \$40-\$100, plus a USD \$35 medical service fee (subject to change without notice).

The current cost for local testing in **Tanzania** ranges from USD \$90-\$200 (subject to change) and can be paid by credit card or cash in U.S. dollars.

The current cost for local testing in **Kenya** ranges from USD \$130-\$355 (subject to change) and may be paid by credit card or cash in U.S. dollars. An additional cost of USD \$150 per person for transportation to/from testing in safari game reserves may apply and is to be paid locally in cash in U.S. dollars.

VACCINATIONS

A yellow fever vaccination is currently required of ALL travellers in order to enter **Uganda**. The vaccine must be administered at least 10 days prior to your arrival, and you must carry an International Certificate of Vaccination provided by your physician; without it, you may be denied entry. You may also be asked to show proof of yellow fever vaccination when leaving Uganda. In addition, applicants are required to upload a copy of their International Certificate of Vaccination when applying for their Uganda tourist visa. If your physician advises against receiving the vaccination because of your personal medical history, he or she can provide you with the necessary documentation for the country/countries you are visiting. *Note: the requirements and enforcements of yellow fever vaccinations to enter and/or leave Uganda are subject to change without notice. As a result, it is prudent to be vaccinated and carry your International Certificate of Vaccination with you, even during times when online sources may indicate it is not required.*

LOCAL HEALTH & SAFETY PROTOCOLS

While in Uganda and Tanzania, face masks must be worn during any indoor or outdoor public activities. In accordance with local regulations in Kenya, face masks are required on public transportation including air travel. In all countries, all persons are required to practice physical distancing of at least 6 feet (2 meters).

We encourage you to bring your own masks; a supply will be on hand where needed. Note all protocols are subject to change in accordance with relevant guidelines, local regulations and conditions.

Because of Uganda's high elevations, you may experience altitude sickness. Please consult your healthcare provider for suggestions on prevention and treatment.

CASH & CREDIT CARDS

Uganda, Tanzania and Kenya have cash-based economies. Cash transactions can be made in either U.S. dollars or the local currency in each country. U.S. dollars should be recently issued bills in smaller denominations. Major credit cards are accepted on a very limited basis, mainly in the largest shops, hotels and lodges. Access to ATM machines is available in larger cities, but limited in rural areas.

OF SPECIAL NOTE: PLASTIC BAGS

Plastic bags are banned in Uganda, Tanzania and Kenya. The ban applies to "carrier and flat bags," primarily targeting bags from shops and grocery stores, but also extending to Ziploc bags, duty-free bags and bubble wrap. If tourists have those types of bags visible while in the airport, they are likely to be confiscated. Bags designed for multiple use, such as zippered cosmetic bags, are not included in the ban.

PACKING LIST & BAGGAGE RESTRICTIONS

On flights within East Africa, each passenger is limited to a maximum baggage weight of 33 pounds (15 kilograms). This includes the weight of purses and camera equipment in addition to regular luggage. Luggage restrictions are adhered to very strictly and passengers should pack their bags accordingly. Soft-sided luggage or duffels are preferable to hard luggage for storage on safari vehicles and also on aircraft used throughout East Africa. Dimensions should not exceed 23 inches (58 centimeters) long x 13 inches (33 centimeters) high x 10 inches (25 centimeters) wide. As a convenience, A&K provides each safari guest with a complimentary, custom-designed A&K Duffel. This bag is specifically crafted to meet airline standards.

Flights aboard light aircraft within East Africa may not be direct. Multiple stops may be made to offload passengers at safari camp landing strips. A change of aircraft may be required.

Please use the provided A&K luggage tags, even if your bags already have ID tags. This makes it easier for A&K staff to collect and manage your luggage for you.

Safe Travel Essentials

Be sure to bring personal protective equipment (PPE), including face masks, travel-sized hand sanitizer with at least 60% alcohol, facial tissues and disinfecting wipes or spray.

Clothing

Choose comfortable and casual clothing in natural, "breathable" fabrics and versatile styles that can be layered, as temperatures may vary considerably in the course of the day. For game viewing, wear neutral colors (though not camouflage, which is illegal in most national parks and reserves). Black, navy or other dark colors tend to attract insects. Smart casual attire is appropriate for evenings. Formal clothing is not necessary.

When primate tracking, wearing long pants and shirts made of sturdy fabric is recommended to protect against scratches from stinging nettles and thorny vegetation. Bring a good pair of comfortable walking/hiking boots with textured soles, and ideally a good pair of protective leather or garden gloves should be worn. Gaiters are also highly recommended. Avoid wearing perfume or cologne. Those with longer hair may wish to wear it in a ponytail or tuck it under a hat to avoid being tangled with thorny vegetation or flying insects.

- Casual slacks
- Walking shorts
- Polo shirts, casual short-sleeve shirts or blouses
- Long sleeve shirts or blouses
- Comfortable walking shoes with traction
- If you are travelling during Africa's winter months of mid-May through early September, bring warm clothing — heavy sweater, hat, gloves, lined jacket — to protect against chilly early morning and evening temperatures. A lined jacket is needed year-round when visiting the Ngorongoro Crater
- A pair of rubber beach sandals to use as slippers.
- Brimmed hat for sun protection
- Swimwear/cover-up
- Personal garments
- Sports bra for women for bumpy roads
- Sleepwear
- Socks

Other Recommended Items

- Sunglasses / Sun block
- Insect repellent with high % of DEET to protect against mosquitos and tsetse flies*

- Prescriptions and medications (in their original bottles and/or packaging)
- Extra eyeglasses/contact lenses
- Charging cables for electronics
- Simple first-aid kit
- Smartphone
- Global travel adapter

Optional Items

- Small LED flashlight
- Lightweight binoculars
- Inflatable pillow or stadium cushion can make bumpy roads more comfortable
- Foldable walking stick
- Small daypack or fanny pack
- Low-suds detergent for washing small items of personal laundry

*Note: many properties provide insect repellent in rooms/tents. However, you may wish to bring your own preferred brand.

Laundry Service is available at most hotels, lodges and camps. Because some laundries in Africa do not accept any underclothing, be prepared to wash your own smalls. Laundry techniques may not be suitable for delicate and/or synthetic fabrics. Check costs and return times before using these services.

TIPPING GUIDELINES

While decisions regarding tipping rest entirely with you, we suggest the following gratuities (noted in U.S. dollars) depending on the type of journey.

| | All Small Group Journeys and Pre/Post Tour Group Extensions | Tailor Made and Signature Journeys |
|---|--|---|
| Resident Tour Director or Group Extension Guide | \$15 per person, per day | Not applicable |
| Safari Driver-Guides | \$10 per person, per day | \$15 per person, per day |
| Local Safari or City Guides | Not applicable | \$20 per person, per day (full day) |
| Hot Air Balloon Pilots (if applicable) | \$10 per person | \$10 per person |
| Airport Transfer Drivers | Included | \$5 per person, per transfer |
| Hotel Porters | Included | \$2 per bag |
| Bush Lodges and Permanent Tented Camps | Included | \$10 per person, per day – Gratuities are accepted at each property and shared among the staff. |
| Housekeepers | Included | \$2 per person, per night |
| Included Meals | Included | Included |
| Restaurants or Room Service on Own | 10-15% unless already added | 10-15% unless already added |

For extra nights or Tailor Made services added to a Small Group Journey, please follow the Tailor Made Journeys guidelines for these days only.

OF SPECIAL NOTE: GORILLA TRACKING IN UGANDA

The following information will help you get the most from a once-in-a-lifetime wildlife adventure.

There are three sub-species of gorilla in the world. The western lowland gorilla and the eastern lowland gorilla are, respectively, native to West Africa and East-Central Africa. The third sub-species – the mountain gorilla (*Gorilla beringei beringei*) – is one of the most endangered species in the world and found only in isolated habitats in Uganda and Rwanda.

King Kong Versus Dian Fossey

When pioneering British explorers of the 19th century first brought word of their existence to the Western world, gorillas quickly developed a reputation as unpredictable, aggressive marauders. Fed by popular culture (think “King Kong”), this sensational characterization was contradicted by science when Dian Fossey began her famous studies of mountain gorillas in the Virungas.

Ms. Fossey’s groundbreaking observations, which began in 1963 and continued until her death in 1985, proved that gorillas were surprisingly gentle vegetarians with an elaborate social structure. Her efforts also brought world attention to the gorillas’ plight, as poaching and loss of habitat continued to severely reduce its already-dwindled numbers.

Gorillas and Tourism

Today, tourism is fundamental to the preservation of gorilla habitat and, ultimately, to the survival of the gorilla itself. There are no mountain gorillas in captivity; they do not survive long or breed outside their highland forests.

Tourism finances habitat preservation, anti-poaching and community conservation efforts, habituation of gorilla families, and safeguards to limit the number of visitors and prevent exploitation of the species. As local people continue to be employed as trackers and guides, their lives and the lives of the gorillas have become increasingly interconnected, offering added hope for long-term survival.

What to Expect on a Gorilla Tracking Excursion

The day begins early. Set your alarm clock for an early-morning call, as you will want to be washed, dressed and breakfasted in time to leave camp at 7:45 am. Wear neutral colors and bring your rain gear. Long sleeves and long trousers tucked into your socks are a must: protection against ants, stinging nettles and whipping foliage.

After arriving at the Park Headquarters, you will join your guide(s) and tracker(s) and begin tracking. Your lead tracker looks for clues—footprints, gnawed bamboo, dung—which indicate the location of a gorilla group.

Note: It is highly recommended that guests hire a personal porter (arranged and paid for locally) to assist you during the trek.

Definitely Not a Walk in the Park

Mountain gorillas prefer densely overgrown landscapes with plenty of food plants near the ground, and they think nothing of climbing extremely steep slopes to reach the vegetation they like. As a result, tracking gorillas can be very difficult for humans.

You may walk for three or four hours to find them, followed by an equally long and potentially difficult return trip. En route, you may find yourself challenged by mud, slippery slopes, stinging nettles and paths leading across deep beds of thick vines.

Correct footwear and clothing are essential, as is general good health and excellent physical condition. A pre-departure program of walking, stair-climbing, bicycling, knee bends or similar exercise will help build strength and stamina for your trek. Ask your doctor for his/her recommendations.

Trackers usually allow for brief rest breaks en route, but they must be mindful of the time required to get out to the gorillas, spend a full hour with them, and return back down the trail before dark. As a result, their usual pace is brisk and steady. If you fall behind the group or are having difficulty negotiating some portion of the trail, a staff member will stay with you to assist, but the rest of the group will probably continue forward.

Sniff, Sniff—Gorillas!

You will probably smell the gorillas before you see them. As you move closer, your tracker will make soft smacking and groaning sounds to assure the group that friends are approaching. If your morning trek has not been unusually long, you are likely to visit gorillas during their midday rest and play period.

The dominant male (usually a silverback) lounges on the ground or against a tree while youngsters roll in the vegetation and climb on trees, vines and each other. Females nurse and play with their infants. Occasionally, a curious adolescent may approach you or someone in your party, but remember that touching gorillas is strictly forbidden.

Stay Low and Quiet

Your group will be instructed to crouch down and stay together while observing gorillas. The dominant male wants to be able to see you at all times, to ensure that his family is not being threatened or surrounded. Don't stare directly into the eyes of a gorilla—along with humans; they share the sense that a fixed stare is an aggressive gesture. Stay low, maintain a subservient posture and watch them sideways or from below.

Sometimes, as a release of tension or a display for the rest of the group, a male gorilla will charge a tracking group, beating his chest, tearing vegetation and hurling his bulky frame in your direction. It's a bluff. Hard as it is not to run, maintain your crouching position and try not to flinch. The gorilla will stop before reaching you and calmly return to his previous position, probably with a smug glance over his shoulder. While such displays may turn savage between males of different gorilla families, they are simply a performance—albeit a breathtaking one—when used with human observers of habituated gorilla groups.

Tracking groups spend up to one hour with the gorillas on each excursion. This time limit is carefully observed; it protects the animals from undue stress. If your group stayed longer, the gorillas would probably end the visit themselves, by simply leaving. Habituated to human company as they may be, their naturally shy, private nature would reassert itself in the end.

Please note: The flora and fauna of Uganda's national parks and reserves is strictly protected. Open fires are banned. Vegetation should not be damaged or destroyed unnecessarily. You are asked to leave nothing behind after your stay with the gorillas; carry all litter back to base with you.

Frequently Asked Questions

Q. Can I photograph the gorillas?

A. Yes, photography is allowed. But photos must be taken within the physical limitations of a gorilla visit: from a low, crouched position with slow, minimal movement. Don't take an excessive number of photos and never use a flash. Taking videos of the gorillas is permitted, but only without illumination lights.

Q. Can I touch a gorilla?

A. Absolutely not. Gorillas are curious creatures, and younger animals especially may approach or attempt to touch human visitors. Don't reciprocate! Your guide may take steps to discourage this curious behavior, as it could create a threatening situation with the dominant male. You yourself should never attempt to approach or touch a mountain gorilla.

Q. Is it possible to predict how long or how hard my group's forest trek will be?

A. Tracking conditions vary according to the gorillas' location on any given day, so the level of difficulty for any specific trek is impossible to define in advance. It's entirely possible that you will find the gorillas quickly and be back in time for lunch. It's also possible that you may trek three or four hours — or longer — each way, and end your excursion just as the sun goes down.

Q. What happens if I find that the trek into the forest is too hard for me?

A. If you just can't manage one more slippery slope or muddy hillside, advise your guide. Depending on the point at which you stop, you'll immediately return to the base of the trail with a member of the tracking staff, or be asked to remain in place (with a staff member) until met by the group on its return leg.

Q. Is it possible to arrange a private viewing—just me, the guides and the gorillas?

A. No, all gorilla tracking takes place in small groups of from four to eight people per gorilla family. There are several different gorilla families. To guard the gorillas against stress, visits are limited to one hour per family per day—regardless of the number of people in the visiting group. With the available time already so limited, private visits cannot be arranged.

Q. I've heard that if I have the sniffles on the day of my gorilla excursion, I won't be able to go. Is this true?

A. Yes. Diseases such as colds, respiratory infections or diarrhea can be passed to gorillas by human visitors. If you have a cold or similar communicable ailment at the time of your tracking excursion, tell your guide. You won't be able to visit the gorillas, but the cost of your gorilla-tracking permit will be refunded. If you set off on the trek anyway and the guide notices that you're sick, you'll be escorted back to the base immediately. Your tracking permit fee will not be refunded.

Q. Does A&K guarantee that I'll be able to spend "quality time" with the gorillas?

A. No one can make this guarantee. Although trackers are very skilled at finding signs of gorillas and their movements, even the most experienced do not meet with 100% success. You should also be aware that consistent, clear viewing at close range is not always possible, given the dense vegetation in which gorillas prefer to roam.

Please note: Abercrombie & Kent does not control the administration or play any part in the operation of Uganda's national parks and reserves, including Bwindi Impenetrable Forest where gorilla tracking occurs. These areas are the total responsibility of local authorities. If our local staff observe situations which merit improvement, they will request that changes be made, but the authorities in charge are under no obligation to do so.

While Abercrombie & Kent has an excellent relationship with local authorities who are eager to help us look after our guests, gorilla-tracking excursions are operated by these authorities, not by Abercrombie & Kent.

Abercrombie & Kent believes that, if you travel with a sense of adventure, the rewards of gorilla tracking will far outweigh the demands of the trip.
